

Would you like some of the UK's most innovative minds working on your company's challenges?

Why not join us at **AIMday® Sensor Signal Processing & Imaging** on 21st September 2016 in Edinburgh which will tackle company needs for new knowledge in sensor systems from mass produced to specialist high-value sensors.

The UDRC, a consortium of seven leading universities funded by Dstl and EPSRC develops research into signal processing for defence. This is an ideal opportunity to benefit from the transfer of these skills to other sectors to tackle technical challenges in sensor signal processing and imaging.

What is AIMday?

AIMday stands for Academic Industry Meeting day. It is a one day event at which companies submit a question or commercial challenge within the chosen AIMday topic. Multi-disciplinary academics with knowledge on how to address the specific company challenges then self-select the questions which they believe they can add most value to. On the day itself, the academics attend a one hour workshop face to face with the company to discuss possible pathways to a solution. There is no limit to the number of questions each company can pose.

What AIMday Sensor Signal Processing & Imaging offers:

- Meet with academics who can contribute to solving your company challenges.
- Find out about the latest cutting edge research from academics, which could be applied to your specific challenge.
- Explore new opportunities for product and business development through collaboration with academic researchers.
- Meet representatives from other companies/organisations.

Register your attendance and questions at:
www.aimday.se/sensors-edinburgh-2016

Register questions you want to discuss

AIMday Sensor Signal Processing & Imaging will tackle company challenges and needs for new knowledge and innovation. The event is built around individual company workshops at which some of the UK's most innovative minds will tackle specific challenges in order to find possible pathways to solutions. We welcome questions from both companies and public organisations.

Submit your questions
25th May -
15th July 2016

Researchers sign up for questions 25th July - 2nd Sept 2016

Matchmaking and formation of discussion groups

The meeting day 21st Sept 2016

Follow Up

AIMday – How it works

One question, one hour, a group of academic experts – the AIMday format is unique. It all starts with your question.

Information and registration at:

www.aimday.se/sensors-edinburgh-2016

Registration opens for companies to submit their questions on 25th May 2016. Participation in the event is free of charge and there is no limit on the number of question's each company can pose around the event theme. Registration closes on 15th July 2016.
