

Useful Reading Materials

A supplement supporting the slides presented as part of Day 2 on Sensing and Tracking at the UDRC Summer School, June 2019.

David Cormack*, Mengwei Sun and James R. Hopgood, *drc9@hw.ac.uk

Firstly, a big thank you to everyone that attended our sessions at the UDRC Summer School this year. We hope that the material was informative, and managed to cover a lot of bases in the short time that we had available! As promised, we have compiled a (non-exhaustive!) list of papers/textbooks/general materials that could be useful as future reading, and help expand on the topics discussed on the day.

As this is the first year we've attempted this completely new approach to teaching the target tracking material, we would like as much feedback as we can get so that we make adjustments for next year! We would encourage you to complete the final evaluation form after the summer school is completed, and if you have any follow-up questions about any of the materials presented, please direct them to drc9@hw.ac.uk.
